

Title: Budget Overview for Animal	Priority: High	Estimate: 3
user story:		
As a zookeeper, I want to view a clear budget overview for my animal,so that I can track spending and avoid exceeding the monthly budget.		
Acceptance Criteria:		
Given the zookeeper is logged in, When they open the budget page for their animal, Then the system displays total budget, amount spent, amount reserved for pending orders, and amount not spent - with a graphical representation.		
Given the zookeeper has a pending order that has not arrived yet,When they view the budget, Then the invoice total of the pending order is shown as 'reserved' and is NOT deducted from the budget.		
Given the zookeeper is planning a new order,When the invoice total would exceed the remaining budget,Then the system warns the zookeeper that the budget will be exceeded.		
Title: Respond to Budget Increase Request	Priority: High	Estimate: 5
user story:		
As a zoo director,I want to receive and respond to budget increaserequests, so that I can control zoo finances and support zookeepers when necessary.		
Acceptance Criteria:		
Given a zookeeper has submitted a budget increase request, When the zoo director opens the request, Then the system shows the request message, a link to the animal's budget, a link to the feed stock, and the average cost per order.		
Given the zoo director grants the request and enters an amount,When they confirm the decision, Then the budget is increased by that amount, all responsible zookeepers receive a notification, and the budget overview is marked 'additional funds granted on request'.		
Given the zoo director denies the request and writes a statement, When they confirm the decision, Then a message with the statement is sent to the zookeeper, and the budget overview shows 'additional funds were requested but not granted' with a link to the request and answer.		
Title: Schedule Creation for Next Month	Priority: Med.	Estimate: 4
user story:		
As a secretary, I want to create a work schedule for the next month using employee information, so that all animals are properly cared for and the employee budget is not exceeded.		
Acceptance Criteria:		
Given the secretary is creating next month's schedule, When she sorts employees by tasks, working hours, and availability, Then the system displays a filtered and sorted list of available personnel.		
Given the secretary adds an employee to the schedule during their planned holidays, When she confirms the selection, Then the system shows a warning that the employee has planned holidays during that period.		
Given the secretary wants to include a temporary worker, When the total cost of temporary workers would exceed the employee budget, Then the system warns her and allows her to send a budget increase request to the zoo director with a short statement and requested amount.
